

# World Wetland Network

## Strategic Plan 2019-2021

The World Wetland Network (WWN) has two main goals: supporting local people to get better protection for their wetlands and improving collaboration with government for wetlands conservation. The 2019-2021 strategic plan will guide WWN to Ramsar's 14th Meeting of the Conference of the Parties (COP14) in 2021 where our work will inform the Ramsar Conventions' reports, decisions, and requests to member governments.

At Ramsar COP14, we will shine a light on youth engagement in wetlands; the natural flow of rivers; and citizen science. We will inform the Global Wetland Outlook and national reporting with more detail about the state of the world's wetlands, and influence resolutions that the official participants take home to their governments for implementation.

### Main objectives for COP 14:

- ⇒ Support the Youth Engaged in Wetlands group to participate in Ramsar COP 14.
- ⇒ Conduct a citizen science wetland survey in 2020 and present the results at COP 14 in 2021.
- ⇒ Influence and create resolutions including to support the natural flow of water for wetlands.
- ⇒ Facilitate effective civil society participation at the COP 14

### About us

We are a global network of 150+ local non-governmental or civil society organisations working to conserve wetlands. By joining forces under the World Wetland Network we can amplify our local voices to influence government policy on a global scale.

WWN is supported by a committee of NGO representatives who meet regularly. We share information across the membership by email, social media, and website, so please get in touch!

*WWN regional representatives, youth delegates & members at Ramsar COP 13 in Dubai, our 10th Ramsar meeting.*

### How can WWN support members?

- ⇒ Provide support, information and ideas on the wetland conservation challenges you face
- ⇒ Represent members and your wetlands at COP14
- ⇒ Report on the status of your wetlands via WWN's citizen science tool
- ⇒ Offer guidance from our committee of experts
- ⇒ Inform members of the latest in wetland news with two bulletins a year
